What amount of income would fulfill your dreams (annual, monthly)?

How many customers could you interest in purchasing products?

How much would these customers purchase (annual, monthly)?

How many people could you interest in supplementing their income with their own business?

Fig. 8b

STEP 1	STEP 2	STEP 3	STEP 4	STEP 5
<p>How does a dream come true? It starts with customers brought to Quixtar by you. They may purchase products as Clients at Suggested Retail and you keep the basic discount or they may become Members to buy at a significant discount and you profit from a Performance Bonus paid on their sales volume. The basic discount is the difference between the price you pay for the products and the suggested retail price. If your customers were evenly divided between the two participation levels, your income would be:</p>				
You were comfortable with: that purchased:		10 customers <u>\$50 per month</u>		
Total volume purchased:		\$500.00		
This results in a retail mark- up of:		\$75.00		
and a Performance Bonus of:		\$14.66		
If you did this every month, your annual income would be:		\$1,076.00		

Fig. 8c

STEP 1	STEP 2	STEP 3	STEP 4	STEP 5
<p>This is a business of balance. If you brought 3 people into the business and they repeated your customer success, each would contribute to the volume on which your Performance Bonus is based.</p>				
3 business builders:				\$1,500 per month
Your customers:				<u>\$500 per month</u>
Total sales:				\$2,000.00
The total sales yields a net				
Performance Bonus of:				\$131.97
Added to the retail mark-up:				<u>\$75.00</u>
Total monthly income:				\$206.97
If your group did this every				
month, your annual income				
would be:				
				\$2,483.64
